EST.1

Wall Switch Transmitter

- Can be used with any make of light switch (except dimmers)
- 4 switch inputs
- Up to 100m transmission range to receiver
- Up to 2-year battery life

The EST.1 transmitter can be fitted behind most conventional single to quad gang wall switch plates (not supplied) and uses 2 x AAA alkaline batteries (not supplied).The switch can be surface or flush mounted almost anywhere without running a single cable. The transmitter will work with any receiver in the EasySwitch range from up to 100m away. You can operate as many receivers as you want and by selecting the receiver MODE the switch can act as a single or two way switch.

Typical uses for the EST1 include switching outside lights or garden features from inside the home.

**Wall switch not included*

Technical Specifications	
	EST1
