

4 WAY Splitter Cable

This 4 way splitter allows you to connect it to a standard 2.1mm jack on any of our Inline power supplies and it then provides you with 4 outputs instead of the single one.

This of course does not provide you with 4 x 1A outputs if you plug it into a 1A Inline PSU. It will still only give you 1A total output across all your 4 outputs

- 1 Female to 4 Male CCTV power splitter cable 2.1mm Jack
- Length 40cm (15.7inch)
- Enables to use one power supply for 4 cameras
