UK series PDU, On/off switch

- Aluminum-alloy shell

power distribution unit (PDU) is a device fitted with multiple outputs designed to distribute electric power, especially to racks of computers and networking equipment located within the data center. Data centers face challenges in power protection and management solutions. Many rely on PDU monitoring to improve efficiency, uptime, and growth.

For Home/office's network and security needs, Expanded USB port creates its possibility to resident application. Furthermore, Standalone USB port comes with convenient operation for a wide range of network and telecom equipments.

- ◆ 1U, horizontal 19" international installation
- ◆ leak-current protector
- ◆ Aluminum-alloy shell, black color
- ◆ Modular made from unflammable PC
- ◆ Children safety protect
- ◆ Break protection, and fused

Parameter

Outlet	13A Max current BS1363(90°) socket
Input	220~250V BS1363(90°) plug
Max output power	2550W
USB outlet	-
Gauge	H05VV-F3G*1.5mm ² *2M length
Additional application	1 X Switch
IP rate	IP-20
Provision for earthing	Standard earthing contact
Type of connections	Welded-solder
Mounting application	19" rack horizontal installation

Additional application functions

Height	1U	1.5U	2U (Combined 1U×2)	
Installation	Horizontal		Vertical	
Surge protect	Each socket		Whole unit	
Indicator	Single light		Three lights	
Industrial plug	16A		32A	
Circuit breaker	1P		2P	
Gauge	1.5mm ²	2.0mm ²	2.5mm ²	4.0mm ²
