BT8380-CASTORS

SYSTEM X™

4" NON-MARKING BRAKED CASTORS

Designed to add mobility to System X stands, the BT8380-CASTORS screw directly into the BT8380-BASE and feature a 4" non-marking rubber wheel that won't damage floors when the solution is stationary or whilst being moved. Supplied in pairs, the castors come with an easy to use brake pedal that keeps installations firmly in place when needed but allows quick and simple repositioning as required.

SPECIFICATION

Wheel diameter	100mm
Wheel width	40mm
Height (including base)	193mm
Castors supplied (per pack)	2
Colour	Black

FEATURES

- Screw directly into the underside of the BT8380-BASE to create a mobile mounting solution for System X
- Non-marking castors allow installations to be re-positioned without damaging or scuffing floors
- Features an easy to use on/off brake pedal that prevents installations from moving once they are positioned

Quickly screws into the BT8380-BASE to add mobility to System X floor stands

Braked mechanism allows the castors to be locked in position

Supplied in pairs, two castors are required for each base used

Non-marking design allows installations to be repositioned without damaging floors
