

Easy as 1 2 3

STEP ONE

Select the ceiling mount required for the installation environment.

We have suitable mounts for any type of ceiling with the ability to hang from a girder or purlin support.

Irrelevant of the roof pitch we have the mounts that will allow the pole to perfectly match the angle of the drop you need.

STEP TWO

Choose the desired pole length, material finish and pole collar for an aesthetically pleasing finish.

Add the pole coupler to join the pole to the bracket and you are nearly good to go.

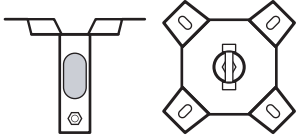

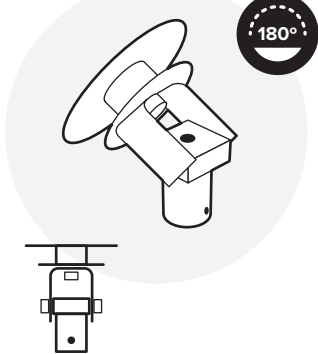

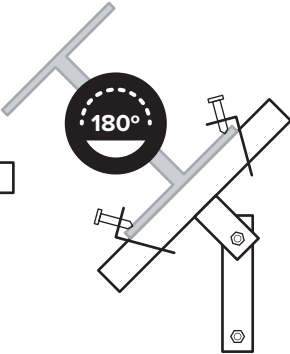

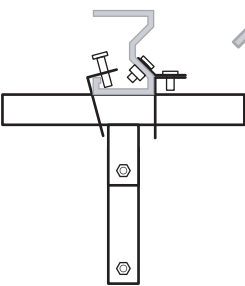

Finally choose a suitable bracket or pole clamp, if needed.

STEP THREE

Finally, select the type of bracket for your camera or monitor type.

With this range you have the flexibility to install in any environment giving you 180 degree angles.

 Why not ask us to save this kit set up and then you can easily reorder.
