	Support the following types of vehicle recognition: bicycle, car, motorbike, bus, truck	
Results Display	Support conditional display results according to specified objects	
	Prohibited Zone : Support triggering an event when specified object(s) enters restricted area	
	Zone with Dwell : Support triggering an event when specified object(s) enters restricted area and stays for a predefined duration of time	
Behavior Detection	Tripwire / Traffic Flow: Support triggering an event when specified object(s) crosses the designed line in a predefined direction	
Denavior Detection	Al Missing Object Detection : Support triggering an event when specified object(s) has been missing from the set detection zone for a predefined duration of time	
	All Object Detection (AND): Support triggering an event when all of the specified objects show up within the set detection zone at the same time (based on AND rule)	
	Lack of any Object Detection (NAND): Support triggering an event when any of the specified objects is not present within the set detection zone (based on NAND rule)	
Recognition Speed	Support object recognition speed up to 4 frames per second
