Al Spec		
Recognized objects	Support detection of the following types of human postures: standing, running, squatting, moving forward, crawling, climbing, hatted, under umbrella, etc	
necognized objects	Support the following types of vehicle recognition: bicycle, car, motorbike, bus, truck	
Results Display	Support conditional display results according to specified objects	
Behavior Detection	Prohibited Zone: Support triggering an event when specified object(s) enters restricted area	
	Zone with Dwell: Support triggering an event when specified object(s) enters restricted area and stays for a predefined duration of time	
	Tripwire / Traffic Flow: Support triggering an event when specified object(s) crosses the designed line in a predefined direction	
	Al Missing Object Detection: Support triggering an event when specified object(s) has been missing from the set detection zone for a predefined duration of time	
	All Object Detection (AND): Support triggering an event when all of the specified objects show up within the set detection zone at the same time (based on AND rule)	
	Lack of any Object Detection (NAND): Support triggering an event when any of the specified objects is not present within the set detection zone (based on NAND rule)	
Recognition Speed	Support object recognition speed up to 4 frames per second	
Number of Detectable Objects	Can detect up to 18 objects per frame	
Video Resolution	Support up to 5M (2880 x 1612) resolution for image capture, 720P resolution is used for recognition	
	Object Type: Support recognizing specified object, instead of processing all types of objects.	
Object Filtering	Object Size: Support 0~100% adjustable size of object (compared to frame) for classification	
	Object Confidence Level: Support 0~100% adjustable confidence level of object	
Event Trigger	Support setting trigger by specific behaviors of specified objects	
	Support setting 8 Cold Zones to minimize false alarms and improve the accuracy	
Detection Time	After an event is triggered by specified object, the next detection will be carried out according to the set detection time (2~30 seconds)	
Minimum Recognition Resolution	Support recognition of specified object with more than 200 x 200 pixels	
Detection Zone / Line	Support setting 4 detection zones (about the size of camera FoV) or lines which are influenced by independent filter condition (object size, confidence, dwell, classification and behavior) and to trigger independent events (output)	
Polygon Detection	Support detection zone which is a polygon that can be freely dragged and that the shape can be modified by 6 draggable anchor points Support detection line which is a line attached to a polygon that the shape can be modified by 4 draggable anchor points. Also, direction of the line can be set by dragging the 4 anchor points or clicking the "Enable direction button"	
Pixel Count	Support displaying the pixel count of selected object(s) on the web UI	
Alarm Output	Digital Output: Support triggering digital output of camera Smart Event: Support triggering up to 4 virtual inputs of camera HTTP POST: Support displaying an alarm on LILIN IP LED Panel / Support displaying an alarm on specific channel of LILIN Navigator VMS / Support triggering digital outputs for LILIN I/O Box / Support triggering digital outputs for LILIN NVR / Support triggering HTTP POST to integrate with third-party devices / Support triggering a PTZ camera to go to a preset	
Heartbeat Checking	Support checking the camera AI operation status and pushing notifications every 1~30 minutes	
Recording System Integration	Support event search to playback or snapshot on LILIN Navigator VMS and NVR
